Verbal Description:

Piece of a scored censer lid. Dark firing core is thick, about 2/3 thickness of item. There is extensive, fairly even blackening on the scored side, reaching a depth of about 1mm. The first 4cm from the edge are slightly darker than the inner part. The lip is also dark from fire, but the smooth side shows much less darkening from fire, though it does show some with the darkest clouds on the inner 3cm. The smooth side is relatively smooth, though lateral striations are

visible. The scored side also shows some striations under the scoring, though these are quite faint. This side is quite a bit rougher than the smooth side, especially near the lip. Diam \approx 29.0cm
